Sedum	4"-6"	8"
Solomon's Seal	30"	24"
Sweet Woodruff	8"	24"
Vinca	6"	18"
Wild Ginger	4"	12"

Why choose a ground cover?

Groundcovers are a great low maintenance choice to cover a large area quickly and inexpensively. These specific plants come in a variety of textures and have different growth habits, with some growing well in clumps and others trailing.

Groundcovers have many uses depending on the area they are grown in. They can be used to create an area to discourage weeds, protect topsoil from erosion and drought, or simply an aesthetic appeal.
