

# Plants That Attract Hummingbirds

## Trees

Crabapple  
Hawthorn  
Horsechestnut  
Redbud  
Tuliptree

## Shrubs

Azalea  
Butterfly Bush  
Buttonbush  
Bottlebrush Buckeye  
Honeysuckle  
Rhododendron  
Rose of Sharon  
Weigela

## Perennials

Beardtongue  
Bee Balm  
Bleeding Heart  
Cardinal Flower  
Catmint  
Columbine  
Coralbells  
Daylily  
Delphinium  
Foxglove  
Perennial Geranium  
Perennial Hibiscus  
Hollyhock  
Hyssop  
Phlox  
Salvia

## Vines

Honeysuckle  
Trumpet Vine

## What attracts hummingbirds?

Nectar is a sugary liquid that is produced by flowers that attracts pollinators. Hummingbirds use this as their food source along with insects and many other animals.

Brightly colored flowers are an attraction to hummingbirds as they do not go by sense of smell. Red and orange flowers are most attractive to these pollinators.
